CALYX MINIMALIST SOAKING TUBS

These baths are supplied with only waste & overflow holes drilled in order to allow options on jobsite in the positioning of spouts, taps, handshowers & whirlpool controls. The bath can be ordered with the overflow positioned in any wall of the well. The only rule is good plumbing.

The bath is strong enough to permit grab bars to be fitted. It requires an extended waste/overflow. These baths have four screw adjustable feet allowing a variation in height of 20mm/1".

The Calyx baths can be sunk or installed with a step if wished.

Cabuchon does not provide standard panels because of the wide range of height, width, and finish/colour variations between individual installations. We can provide bespoke panels as an integral part of the bath if commissioned to do so.

All Cabuchon products are registered designs covered by copyright and the Company, being committed to continuous innovation and improvement, reserves the right to change specifications without notice.

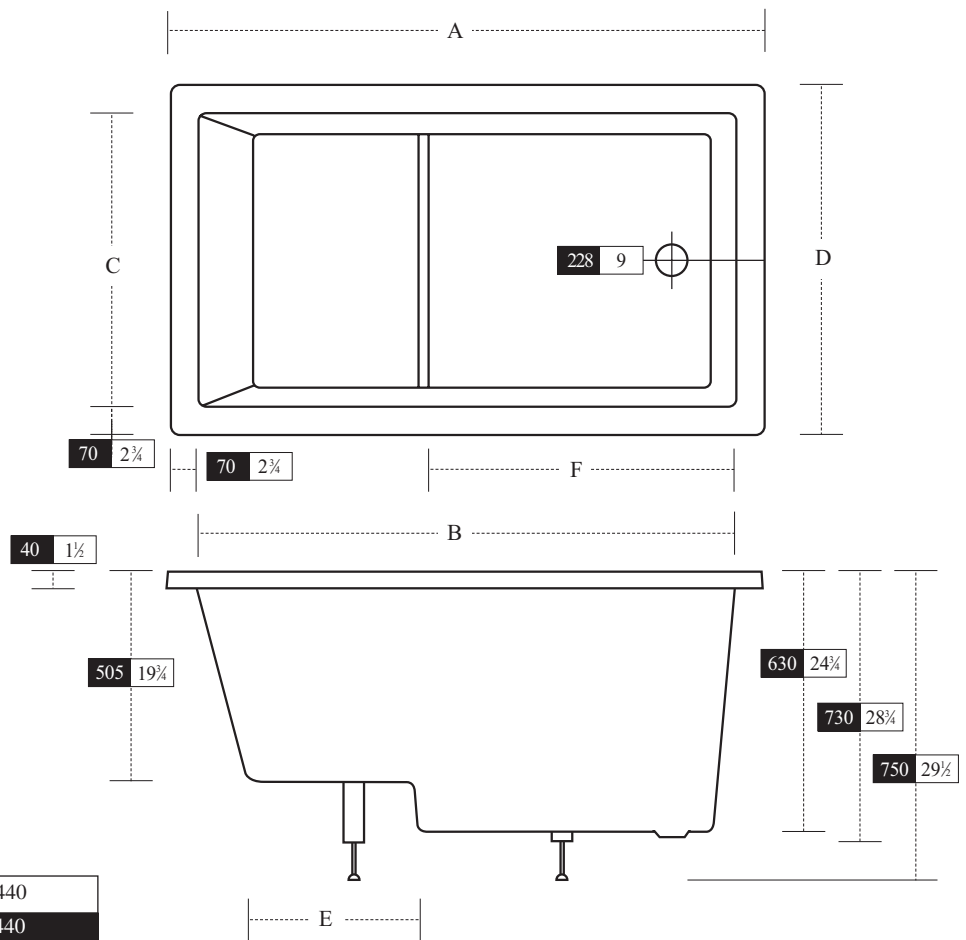

Tolerances are + or - 3 mm.

This bath turned on its side will pass through a minimum door width of 750mm/29½" with feet, or 730mm/28¾" with feet removed.

NORMAL WATER REQUIREMENT - SEE BOX BELOW RIGHT

There are 2 different lengths of baths - for those dimensions that are different, see box below left

KEY TO SIZES: ■ MILLIMETRES □ INCHES TO NEAREST ¼"

Bath Name	1230	1440
