XANADU DOUBLE SOAKING TUB

NORMAL WATER REQUIREMENT

590 litres 129 Imp Gallons 155 U.S. Gallons

KEY TO SIZES: ■ MILLIMETRES □ INCHES TO NEAREST 1/4"

This bath is supplied with only waste & overflow holes. This permits options on jobsite for the positioning of spouts, taps, fillers, handshowers and hydrotherapy controls. The only rule is good plumbing.

The bath is strong enough to permit grab bars to be fitted. It requires an extended waste/overflow. The bath has four screw adjustable feet allowing adjustment between 730mm/28 3/4" maximum and 660mm/26" minimum external bath height.

The Xanadu bath can be sunk or installed with a step if wished.

Cabuchon does not provide standard panels because of the wide range of height, width, and finish/colour variations between individual installations. We can provide bespoke panels if commissioned to do so.

All Cabuchon products are registered designs covered by copyright and the Company, being committed to continuous innovation and improvement, reserves the right to change specifications without notice.

Tolerances are + or - 3 mm.

This bath turned on its side will pass through a minimum door width of 660mm/26" with feet, or 625mm/24 3/4" with feet removed.
